PROFESSIONAL SUMMARY

Fullstack engineer with 5+ years shipping payment systems, real-time services, and multi-tenant platforms for companies in Indonesia and Japan. My core stack is PHP, Go, and TypeScript, and lately I have been building AI agents and RAG pipelines. I write about what I build.

TECHNICAL SKILLS

Languages: PHP, JavaScript / TypeScript, SQL, Go, Python
Frameworks: Laravel / Lumen, NestJS, ExpressJS / Fastify, ElysiaJS, Vue.js
Databases & Caching: PostgreSQL, MySQL, Redis, MongoDB, Firebase Firestore
API & Architecture: REST API design, Swagger / OpenAPI, GraphQL, gRPC, Semi-microservices, multi-tenant
AI & Agents: MCP (Model Context Protocol), AI agents & agentic workflows, LLM integration (OpenAI, Anthropic), RAG
Integrations: Payments (Xendit, Midtrans, Stripe, IPay88), Messaging (Twilio, WhatsApp API), Email (Brevo, MailGun), Logistics (JNE, Google Maps API), Realtime (Socket.IO, Firebase FCM)
Cloud & DevOps: Docker, Git (GitHub, Bitbucket), GitHub Actions, AWS (S3, SQS), NGINX, Laravel Vapor
Auth & Quality: OAuth2 / OIDC single sign-on, MFA and OTP delivery, RBAC, Query profiling & optimisation, PHPUnit, unit testing

PROFESSIONAL EXPERIENCE

Motocle, Inc.
Full-stack Developer (Freelance) | Fukuoka, Japan (Remote) | Apr 2025 - Present
Tech: Smaregi POS, RAG, Booking

- Built new booking and customer-registration features for a veterinary-clinic system, streamlining appointment scheduling and client onboarding.
- Integrated the Smaregi Point of Sale system to unify in-clinic transactions with the platform.
- Implemented a Retrieval-Augmented Generation feature to surface relevant clinical information from clinic data.
- Diagnosed and fixed bugs across the clinic system, improving stability and reliability.

PT Kreatif Transportasi Gemilang (Get And Ride)
Senior Software Engineer | Jakarta, Indonesia | Nov 2023 - Present
Tech: WebSocket, Redis, Midtrans

- Developed a real-time chat API service for web and mobile applications using WebSocket and Redis, enhancing user engagement.
- Implemented a secure payment feature using the Midtrans payment gateway, streamlining product transactions and driving revenue growth.
- Developed a comprehensive voucher system that streamlined payments and significantly increased sales conversion rates.
- Engineered a new driver platform for order task management, earnings tracking, and profile administration.
- Designed and implemented a new airport shuttle service connecting airports to city destinations, expanding service offerings.
- Resolved critical timezone synchronization issues so users receive accurate times based on their location.

ASABA INNOTECH
Senior Full Stack Engineer | Jakarta, Indonesia | Nov 2022 - Jul 2024
Tech: OMS, SFA, SAP

- Developed and deployed an Omni Channel Order Management System (OMS) that streamlined order processing.
- Engineered a robust Sales Force Automation platform (SFA) that enhanced field sales operations and team productivity.
- Designed and implemented a centralized notification system for internal projects across multiple platforms.
- Built a data integration service that synchronizes critical business data from SAP to internal applications.

KB Finansia Multi Finance
Backend Engineer | Jakarta, Indonesia | May 2022 - Nov 2022
Tech: REST API, B2B

- Developed the B2B API project "Join Finance".

PT Alfath Technologi Kreatif
Full Stack Developer (Contract) | Malang, Indonesia | Feb 2022 - Apr 2022
Tech: Laravel, POS

- Built a Point of Sale application for PT SMI GROUP using Laravel, optimising queries and database indexing for performance. Used by roughly 50 outlets across Indonesia.

Esteh Creative
Full Stack Developer (Contract) | Malang, Indonesia | Dec 2021 - Apr 2022
Tech: Finpay, E-commerce

- Integrated the Finpay Emoney payment system into an e-commerce website for seamless, secure transactions.
- Refactored legacy code and optimised data queries, making the application 30% faster and easier to maintain.

PT Datamax Teknologi Internasional
Back End Developer | Malang, Indonesia | Apr 2021 - Dec 2021
Tech: Go, Delivery APIs

- Migrated the backend from PHP to Golang, improving application performance by 50%.
- Integrated delivery services using Gosend, JNT, and JNE, adding 500 new users.

Remote Worker Indonesia
Backend Developer (Contract) | Yogyakarta, Indonesia | Sep 2021 - Oct 2021
Tech: REST API, Dashboard

- Built the REST API and admin dashboard for the mobile app of PUSAT PELATIHAN PERTANIAN BPPSDMP - KEMENTAN.

PT. Ergossum Sukses Makmur
Full-stack Developer | Malang, Indonesia | Aug 2020 - Feb 2021
Tech: Laravel, Xendit, E-commerce

- Doolen: API creation, frontend integration, and Xendit payment gateway integration for a cooking-ingredients e-commerce website.
- Esusmart: API creation, frontend integration, and Xendit payment gateway integration for a cooking-ingredients e-commerce website.
- Froya: API creation and frontend integration for a processed-chicken e-commerce website.
